

Federal Channel Engagement Summary

CarbonCore is actively pursuing multiple federal engagement channels to support its \$1.2 billion Sustainable Aviation Fuel (SAF) platform, including financing, permitting, and water infrastructure support.

Formal Consultation

- Department of Energy Loan Programs Office (DOE LPO): CarbonCore has completed a formal consultation with LPO, and the proposed \$1.2B+ in project financing is aligned with program criteria.

Federal Agencies Engaged

- United States Department of Agriculture (USDA): Outreach initiated regarding loan guarantees and rural development programs.
- Environmental Protection Agency (EPA): Early engagement on water infrastructure and community-scale reservoir support.
- Department of Defense (DoD): Outreach in progress regarding long-term offtake opportunities under federal SAF procurement initiatives.

This strategy provides the basis for long-term capital stacking, infrastructure support, and national energy security alignment.
